Sequence 1753, Application US/09371772B

Sequence 1753, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:
PAPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Stinchomb, Dan
APPLICANT: Stinchomb, Dan
APPLICANT: Stinchomb, Dan
APPLICANT: Bacobedo, Jaime
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION NUMBER: US/09/371,772B
CURRENT FILING DATE: 1995-10-26
PRIOR APPLICATION NUMBER: US 60/005,974
PRIOR APPLICATION NUMBER: US 08/584,040
PRIOR FILING DATE: 1995-10-26
PRIOR PLING DATE: 1995-10-26
NUMBER OF SEQ ID NOS: 14225
SOFTWARE: PatentIn Version 3.0
SEQ ID NO 1753
TANNETS.
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Religious Dinvention: Levels of Vascular Endothelial Growth Pactor Receptor FILE OF INVENTION: Levels of Vascular Endothelial Growth Pactor Receptor FILE REPERENCE: MBHB00,876-J (237/198)

CURRENT APPLICATION NUMBER: US (90/371,772B

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   UEBULT 431

15-09-371-772B-4748

Sequence 4748, Application US/09371772B

Sequence 4748, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:
APPLICANT: Ribozywe Pharmaceuticals, Inc.
APPLICANT: Stinchcomb, Dan
APPLICANT: Bacobedo, Jaime
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION NUMBER: US/09/371,772B
CURRENT APPLICATION NUMBER: US 60/005,974
PRIOR FILING DATE: 1995-10-26
PRIOR FILING DATE: 1995-10-08
NUMBER OF SEQ ID NOS: 14225
SSCPTWARE: Patentin Version 3.0
SEQ ID NO 4448
LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            GENERAL INFORMATION:

                                                                                                                                                                                                                                                                                   35-09-933-700-22/c
Sequence 22, Application US/09933700
Patent No. 6528296
GENERAL INFORMATION:
APPLICANT: THE INSTITUTE OF Physical and Chemical Research
TITLE OF INVENTION: Endonuclease
FILE REFERENCE: PH-651
CURRENT APPLICATION NUMBER: US/09/933,700
CURRENT FILING DATE: 2001-08-20
PRIOR APPLICATION NUMBER: 09/316,083
PRIOR APPLICATION NUMBER: 09/316,083
PRIOR PLING DATE: 1999-05-20
NUMBER OF SEQ ID NOS: 38
SOFTWARE: Patentin Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 42, Application US/09043149
Patent No. 6355418
GRNERAL INFORMATION.
GRNERAL INFORMATION.
GRNERAL INFORMATION.
TITLE OF INVENTION: Chimeric Oligonucleotides and Uses Thereof in the TITLE OF INVENTION: Identification of Antisense Binding Sites
TITLE OF INVENTION: Identification of Antisense Binding Sites
FILE REPRENCE: 020600-272
CURRENT APPLICATION NUMBER: US/09/043,149
CURRENT PILING DATE: 1998-03-13
PRIOR FILING DATE: 1996-03-13
PRIOR PLICATION NUMBER: GB 9518864.5
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ..

INFORMATION FOR SEQ ID NO: 3:
SEQUENCE CHARACTERISTICS:
LENGTH: 16
TYPE: nucleic acid
STRANDEDRESS: single-stranded DNA
TOPOLOGY: linear
MOLECULE TYPE: oligonucleotide
SEGUENCE BESCRIPTION: SEQ ID NO: 3:
US-09-564-399A-3

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Š
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ESULT 499
S-08-319-492B-165
Sequence 165, Application US/08319492B
Patent No. 561648B
GENERAL INPORMATION:
APPLICANT: Sullivan, Sean M.
APPLICANT: Sullivan, Sean M.
APPLICANT: Stinchoomb, Dan T.
TITLE OF INVENTION: REMOZYME TREATMENT OF DISEASES
TITLE OF INVENTION: OR CONDITIONS RELATED TO LEVELS
TITLE OF INVENTION: OF IL-5
NUMBER OF INVENTION: OF LI-5
NUMBER OF INVENTION: OF LI-5
NUMBER OF SEQUENCES: 751
CORRESPONDENCE ADDRESS:
ADDRESSEE: G33 West Fifth Street
STREET: 633 West Fifth Street
STREET: Suite 4700 € Lyon
STREET: Suite 4700
CITY: LOS Angeles
STATE: California
COUNTY: U.S.A.
ZIP: OS Angeles
STATE: The Condition of the Condition of the Compatible
COMPUTER: IBM Compatible
COMPUTER: IBM Compatible
COMPUTER: October 7, 1994
PRIOR APPLICATION DATA: Including application
PRIOR APPLICATION NUMBER: 00/08,995
FILING DATE: October 7, 1992
ATTORNEY AGENT INPORMATION:
NAME: WANDER ADDRESS: DECEMBER 7, 1992
ATTORNEY AGENT INPORMATION:
